

Silicon Labs Security Advisory

A-00000579

Subject: Zigbee command handling vulnerabilities in Zigbee Application Framework (ZAP)

CVSS Severity: High

Vector String: [CVSS:4.0/AV:N/AC:L/AT:N/PR:L/UI:N/VC:N/VI:N/VA:H/SC:N/SI:N/SA:N](#)

Impacted Products

- Zigbee devices running EmberZNet SDK 9.0.2 or earlier may be impacted
 - These versions are packaged with SiSDK 2025.12.3 and earlier
 - These versions are packaged with GSDK 4.5.0 and earlier

Product	Impacted Version
SiSDK	SiSDK 2025.12.3 and earlier
GSDK	4.5.0 and earlier

Notice: The contents of this Notification are provided exclusively for the internal use of the recipient in support of devices supplied by Silicon Labs and shall not be shared with or distributed to any third parties. This Notification shall not be posted on any blog, website, board or social media. The contents are for general information only and do not purport to be comprehensive. While Silicon Labs provides this information in good faith and makes every effort to supply correct, current and high-quality guidance, Silicon Labs provides all materials (including this document) solely on an “as is” basis without warranty of any kind. Silicon Labs disclaims all express and implied warranties. In no event shall Silicon Labs be liable for any damages whatsoever, including direct, indirect, incidental, consequential, lost profits or special damages related to or arising from the adequacy, accuracy, completeness or timeliness of this document or its contents, even if Silicon Labs has been advised of the possibility of such damages. Nothing in this Notice excludes any liability for death or personal injury caused by negligence, or for fraud or intentional misrepresentation. By accepting or using the information contained in this Notification, the recipient agrees to that this Notification and its use are governed by the laws of the State of Texas, excluding its conflicts of law’s provisions.

CVE ID(s)

CVE Number	Description	Attack Nature
CVE-2026-4526	Global ZCL command parser missing minimum-length validation	DoS
CVE-2026-47145	Color Control hue/saturation assertion abort	DoS
CVE-2026-47146	Color Control color-temperature assertion abort	DoS
CVE-2026-47147	OTA server raw parser missing per-field bounds validation	DoS, Memory leakage OTA
CVE-2026-47148	Groups GetGroupMembership count/list-length mismatch	DoS
CVE-2026-47149	Door Lock GetUserType invalid table index	DoS
CVE-2026-47150	IAS Zone enroll invalid table index and write	DoS, Memory corruption
CVE-2026-47151	Door Lock ClearWeekdaySchedule invalid table index and write	DoS, Memory corruption
CVE-2026-47152	Level Control Move divide-by-zero	DoS
CVE-2026-47153	Level Control Step with On/Off divide-by-zero	DoS
CVE-2026-47154	Simple Metering GetProfileResponse interval-bounds bug	DoS

Technical Summary

- This report covers eleven Zigbee command handling vulnerabilities identified in the Zigbee Application Framework (ZAP). A malicious device admitted into the Zigbee network could crafted malformed packets that trigger these vulnerabilities.
- Most of the vulnerabilities above result in memory access faults or arithmetic faults that will lead to a reset. These vulnerabilities are marked with “DoS” in the Attack Nature column of the table above.
- [CVE-2026-47147](#) covers an out-of-bounds read that could lead to RAM leakage over the air.
- [CVE-2026-47150](#) covers an out-of-bounds write of one byte that results in a hard fault.
- [CVE-2026-47151](#) covers an out-of-bounds write that could corrupt runtime variables.

Fix/Workaround

- The following SDK release addresses the vulnerability. Customers are always recommended to upgrade to the latest SDK version.
- Instructions for [downloading/updating the SDK](#) and for [upgrading a project](#) can be found in the Simplicity Studio Users Guide.

Product	Fix Version	Release Notes
SiSDK	2026.6.0 or later	Zigbee SDK Release Notes

Attribution

- This vulnerability was discovered by external security researchers Junming C. (@Chapoly1305) and Prof. Qiang Zeng of George Mason University.

Revision History

Rev	Date	Description of Changes
1.0	2026-JUN-25	Initial publication
