

Silicon Labs Security Advisory

A-00000580

Subject: Improper length validation in ZAP parser can cause information leakage over the network

CVSS Severity: Medium

Base Score: 5.3

Vector String: [CVSS:4.0/AV:N/AC:L/AT:N/PR:L/UI:N/VC:L/VI:N/VA:N/SC:N/SI:N/SA:N](#)

Impacted Products

- Zigbee devices running EmberZNet SDK 9.0.2 or earlier may be impacted
 - These versions are packaged with SiSDK 2025.12.3 and earlier
 - These versions are packaged with GSDK 4.5.0 and earlier

Product	Impacted Version
EmberZNet SDK	9.0.2 and earlier

CVE ID(s)

- [CVE-2026-6432](#) is reserved for this issue.

CVE Number	Description	CVSS Severity
CVE-2026-6432	Improper bounds validation in EmberZNet SDK versions 9.0.2 and earlier may result in crashes or dynamic memory leakage	Medium

Silicon Labs disclaims all express and implied warranties. In no event shall Silicon Labs be liable for any damages whatsoever, including direct, indirect, incidental, consequential, lost profits or special damages related to or arising from the adequacy, accuracy, completeness or timeliness of this document or its contents, even if Silicon Labs has been advised of the possibility of such damages. Nothing in this Notice excludes any liability for death or personal injury caused by negligence, or for fraud or intentional misrepresentation. By accepting or using the information contained in this Notification, the recipient agrees to that this Notification and its use are governed by the laws of the State of Texas, excluding its conflicts of law's provisions.

Technical Summary

- The ZAP parser generator in impacted versions of the EmberZNet SDK produces message parsers with improper bounds checks.
- Malformed packets sent by a malicious node in the network can cause out-of-bounds reads leading to fault-based crashes or dynamic memory leakage over the network.
- To exploit this vulnerability, an attacker would have to have the ability to send arbitrary messages on the network.

Fix/Workaround

- The following SDK release addresses the vulnerability. Customers are always recommended to upgrade to the latest SDK version.
- Instructions for [downloading/updating the SDK](#) and for [upgrading a project](#) can be found in the Simplicity Studio Users Guide.

Product	Fix Version	Bug ID	Release Notes
SiSDK	v2026.6.0 and later	1617908	Zigbee SDK Release Notes

Attribution

- This vulnerability was discovered by Junming C. (@Chapoly1305) and Prof. Qiang Zeng of George Mason University.

Revision History

Rev	Date	Description of Changes
1.0	2026-JUN-25	Initial publication
